

B^{24/7} Backup *Cloud-to-Cloud & Cloud-to-Local* Solution

While cloud storage offers some level of backup & security, it is not immune from accidental deletions and malicious activities. With '**Cloud-to-Cloud**' or '**Cloud-to-Local**' backup, you can protect your cloud hosted data from those human-caused data loss disasters.

Agentless or Agent-based deployment

You can deploy the Cloud-to-Cloud/Local Backup solution flexibly in agentless or agent-based approach for meeting different needs.

Scheduling

Cloud-to-Cloud/Local Backup can be scheduled to run anytime or on a recurring basis.

High-speed

Our In-File Delta block-level incremental backup and multi-threading technologies enable fast backup and restore performance.

Backup to multi-destinations

Cloud data can be backed up to our cutting-edge offsite Datacentres, network share, FTP/SFTP server, and our designated secure cloud destinations at the same time.

Retention / Versioning

Our backup solution allows you to set flexible retention policies, including daily, weekly, monthly, yearly policies to suit your organisation and compliance needs.

Point-in-time recovery

Cloud data can be restored from any point in time that backup was made. Multiple versions of an item can be recovered through a single restore operation.
