B 24/7 ackup Easy Mobile Backup Solution

- Simple. Secure. Free!
- Provide 2-Factor Authentication on Pro/Lite Client login
- Fully Rebrandable (additional charges apply)
- Send Push Notification to Users

Nowadays, a mobile phone contains abundant precious photos and videos taken every day with family and friends. Losing those precious memories are priceless that couldn't be recovered at any cost. Now with our Mobile app, you can automatically back up those precious photos and videos to the user's Windows / Mac computer whenever the mobile phone and tablet device are connected to the home Wi-Fi.

Auto Backup without Cable Connection

Photos and videos automatically backed up to a selected folder on your Windows or Mac whenever your mobile phone and tablet device is connected to your home Wi-Fi network. No cable connection is ever required.

Stored in Native File Formats

The native formats of photos and videos are preserved. Restore to original or alternate device can be done quickly with just a click.

Organized Daily Folders

Backed up photos and videos will be organized into daily folders for easy retrieval when needed.

Hardened System Security by 2FA

This app also serves as a two-factor authentication (2FA) tool to protect your backup data from being deleted by hackers through your **Pro** and **Lite** backup agents after your computer is being compromised.
